Profile

My name is **Yousef Hassan**, a passionate software developer focused on building smart and integrated tech solutions. I am currently studying at the **Faculty of Computer Science – Menoufia National University**, specializing in **Internet of Things (IoT) and Big Data Analysis**.

I specialize in developing modern web applications using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js), with a particular interest in IoT projects that connect software with hardware, as well as database management and data analysis.

Throughout my academic journey, I've been able to bridge theory with real-world application. I've successfully delivered **more than 6 freelance projects** for clients in various sectors, in addition to participating in university and volunteer projects that combine **web development, artificial intelligence, database systems, and IoT**.

Education

2022 – present
Menoufia, Egypt

Faculty of Computer Science

Menoufia National University

Studying Computer Science with a focus on IoT and Big Data Analysis, I'm gaining practical skills in web development, smart systems integration, and data-driven solution design.

Skills

Technical Skills

- ● ● ● ●
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+) , TypeScript
- **Backend:** Node.js, Express.js, RESTful APIs, JWT
- **Database:** MongoDB, Mongoose, postgresSQL
- **AI & Data:** OpenAI APIs, Google APIs
- **Tools & Platforms:** Git, GitHub, Postman, Docker, Flyio ☑ , Vite , Netlify

Soft Skills

- Strong problem-solving and debugging skills
- Effective team collaboration and communication
- Time management and ability to work under pressure
- Self-learning and adaptability
- Client communication & freelancing professionalism
- Analytical thinking and attention to detail

Projects

05/2025 – present

Automated Customer Support System for Diggipacks – KSA ☑

Developed an automated WhatsApp customer support solution for Saudi-based logistics company Diggipacks, integrating AI and shipping provider APIs to streamline inquiries and issue resolution.

Key Features:

- WhatsApp bot (Node.js + whatsapp-web.js) with GPT-3.5 NLP for intelligent responses
- Automated shipment tracking and issue escalation via Gmail API
- Real-time response forwarding from shipping providers
- React/Tailwind dashboard with conversation analytics

Impact:

- Reduced response time from hours to minutes
- Automated 80% of shipping inquiries
- Enabled 24/7 AI-powered customer support

Tech Stack: Node.js, Express, React, Tailwind, MongoDB, OpenAI API, Gmail API

06/2025 – present

Law360D – AI-Powered Legal Assistant - Saudi Arabia

Collaborated on **Law360D**, an intelligent legal assistant designed to help Saudi lawyers analyze legal cases by identifying strengths and weaknesses using an **AI model integrated with GPT**.

My Role:

- Built the full **frontend interface** using React.js for a responsive and user-friendly experience
- Contributed to the **backend** using Node.js, focusing on user registration and authentication logic
- Supported UI/UX design with Arabic localization tailored for legal professionals

Key Features:

- GPT-powered case analysis with automated strength/weakness detection
- Arabic-first interface designed for legal professionals
- Role-based access system for lawyers and law firms
- Secure user registration and authentication (Node.js)
- Responsive frontend built with React.js

Impact:

- Accelerated legal case assessment for Saudi lawyers
- Reduced manual effort in document analysis
- Enhanced legal accuracy through AI-powered insights

Tech Stack: React.js, Node.js, Express.js, MongoDB, OpenAI GPT API, JWT Authentication

04/2025 – 06/2025

Muzdakhar – Real Estate Investment Platform - Egypt

Developed a full-stack real estate investment platform for Egyptian company Muzdakhar, enabling users to buy, rent, and invest in properties through a share-based ownership model.

Key Features:

- Dynamic property listings for sale, rent, and investment with real-time filtering
- Share-based investment module displaying ownership breakdown and availability
- Role-based dashboards (Admin, Seller, Marketing) to display data and tasks specific to each user.
- Secure user authentication and property linking via National ID
- Arabic-first, RTL-compatible UI with responsive design

Impact:

- Enabled fractional ownership and investment in real estate
- Digitized property management, reducing manual tracking and errors
- Provided scalable admin tools for investor and property oversight

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT Auth, REST API

Certificates

Full-Stack Web Developer – DEPI Program-MERN

Completed an intensive full-stack web development program under the **DEPI initiative** by the Egyptian Ministry of Communications. The program focused on building scalable web applications using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js), along with best practices in software engineering and deployment.

Backend Development Certificate at Mindset

Completed a hands-on training program in **Backend Development** at **Mindset**, focusing on building secure, scalable APIs and server-side applications using the **.NET framework**.
