PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on experience delivering production-ready web applications across healthcare, legal tech, and SaaS domains. Proficient in React.js, Node.js, Express, and MongoDB, with a strong focus on scalable architecture, clean APIs, and results-driven development.

PROJECTS

Hamroush Pharmacy – Full-Stack Pharmacy E-Commerce Platform05/2023

View on GitHub

Built a full-stack pharmacy e-commerce platform featuring online prescription uploads, a curated health products catalog, and automated order tracking — delivering a seamless digital healthcare experience. Reduced dispensing errors through automated prescription verification; smart inventory alerts cut stock-out incidents and minimized losses from expired medication.

Vendbase – Multi-Tenant SaaS Platform - Saudi Arabia06/2025 – Present

View on GitHub

A highly scalable SaaS solution for legal institutions, featuring a robust multi-tenant architecture. Enables multiple law firms to operate securely on a single platform, offering each tenant full control over their data, users, and workflows through a specialized, isolated workspace. Zero data leakage between tenants; reduced per-client infrastructure overhead and enabled fast onboarding for new firms.

Multi-Tenancy

Smart Pharmacy Management System04/2023

View on GitHub

A comprehensive pharmacy management system designed to streamline medication dispensing, inventory control, and patient records. Helps pharmacists manage stock levels, track expiry dates, and generate real-time sales reports — digitizing inventory management, reducing manual errors, and improving patient service through faster processing.
